

Mitigating Cardiovascular Risk Through Lipid Management: From Hospital to Home

This program will provide information highlighting challenges, gaps, and unmet needs in secondary prevention of cardiovascular events and risk reduction in cardiovascular disease (CVD) as well as provide strategies to enhance the CVD care continuum and improve population health management.

PROGRAM OBJECTIVES In this live broadcast, the experts will:

Explore the post-myocardial infarction patient journey—from an inpatient to outpatient setting, identifying unmet needs and tactics to improve patient engagement in the management of CVD

Discuss the role of quality measures in population health programs as well as strategies to improve lipid management
